

Meeting CTE Programming Needs for Students & Industry

Elissa Heal & Rosemary Krieger

Vanguard Sentinel CTC

Career Exploratory

- Freshmen students/semester
- Explore 6-8 career field programs at VSCTC
- Participate in weekly business and industry tours
- Offering physical education and financial literacy credits
- 19-20 offering career exploratory as a satellite program for STEM and Construction Technologies

Silver Level 1

- One-Year program for juniors and seniors
- Students enroll to receive a 12-point credential
- Access to CCP courses
- Participation in CTSO's

Gold Level 2

- Typical two-year program (junior/senior)
- Largest percentage of enrollment
- CCP
- Pre-apprenticeship
- Work placement

Platinum Level 3

- Officially begins 19-20
- Students must have completed a level 2 program, passed Webxam, and obtained industry credential
- Pre-Apprenticeship – Early Childhood Education, Construction, Manufacturing
- CCP
- AIM Industries – in-school, student-run manufacturing lab in partnership with local companies
- Level 1 Silver Program
- Advanced Placement

Bronze

- One-year program offering at-risk seniors an opportunity to receive an industry credential, receive academic recovery support, and obtain necessary WorkKeys scores
- 18-19 Pilot Year - offered manufacturing (CPT) and health (CIP) career fields
- 19-20 – adding business career field (Rise Up)

Table Discussion Points

- What does a quality career tech program look like?
- How should a career tech district meet the needs of their local business and industry community?
- What innovative strategies is your district using to reach students at all grade levels?

Thank you!!
